Project Title: To Supply Leftover Food to Poor

Category: Salesforce

Skills Required: Salesforce Developer

Project Overview

1. Project Objectives and Goals

• **Objective:** This project aims to develop a Salesforce-based application designed to manage and streamline the distribution of leftover food to underserved communities. The primary goal is to enhance the efficiency of food drop-offs, coordinate tasks, manage volunteers, and generate insightful reports.

2. Detailed Description of Implemented Features

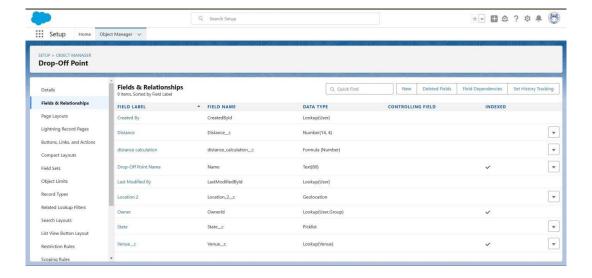

Custom Objects

1. Drop-Off Point:

• **Purpose:** The Drop-Off Point object captures essential details about locations where food is dropped off. This helps in tracking and managing food distribution points effectively.

• Fields:

- **Drop-Off Point Name:** A text field representing the name of the drop-off point.
- Location Details: A text field for additional details about the drop-off point location.
- **Distance:** A number field that records the distance from the drop-off point to the delivery area.
- **Venue:** A lookup relationship field linking to the Venue object to provide a connection between drop-off points and venues.

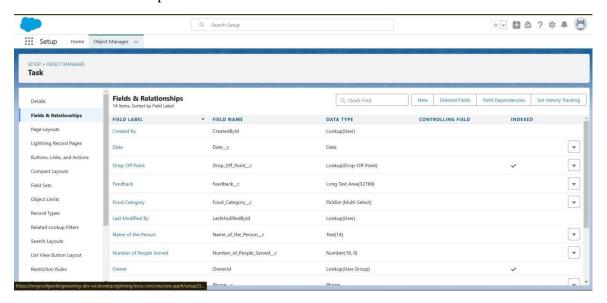

2. Task:

• **Purpose:** The Task object is used to manage and track various tasks related to food distribution, including assigning tasks to volunteers and recording task details.

• Fields:

- **Task Name:** A text field representing the name of the task.
- **Date:** A date field indicating when the task is scheduled or completed.
- **Rating:** A numeric field used to rate the task performance.
- **Drop-Off Point:** A lookup relationship field linking to the Drop-Off Point object to associate tasks with specific drop-off points.
- **Sponsored By:** A lookup relationship field linking to the Drop-Off Point object to indicate the sponsor of the task.

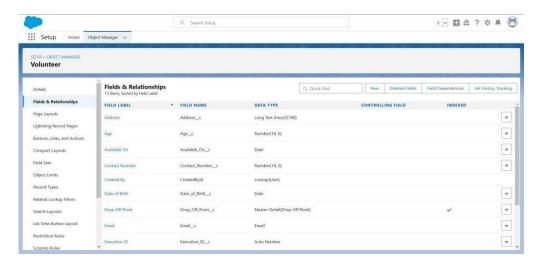

3. Volunteer:

• **Purpose:** The Volunteer object keeps track of individuals who are involved in the food distribution process, including their contact information and assigned tasks.

• Fields:

- Volunteer Name: A text field for the name of the volunteer.
- Contact Email: An email field for the volunteer's contact email.
- Contact Phone: A phone field for the volunteer's contact number.
- **Assigned Tasks:** A related list showing tasks assigned to the volunteer.

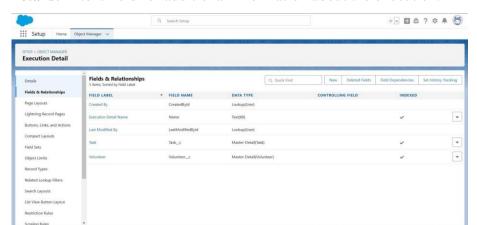

4. Execution Detail:

• **Purpose:** The Execution Detail object captures detailed information about food distribution activities, including which volunteers and tasks are associated with each distribution.

• Fields:

- Execution Detail Name: A text field for naming the execution detail record.
- **Volunteer:** A master-detail relationship field linking to the Volunteer object to associate execution details with a specific volunteer.
- **Task:** A master-detail relationship field linking to the Task object to associate execution details with a specific task.
- **Details:** A text field for additional information about the execution.

Object Relationships:

- Master-Detail Relationships:
 - Execution Detail to Volunteer: Ensures that each execution detail record is linked to a volunteer, making volunteer information essential for each distribution record.
 - **Execution Detail to Task:** Ensures that each execution detail record is linked to a task, making task information essential for each distribution record.
- Lookup Relationships:
 - Task to Drop-Off Point: Connects tasks to drop-off points, providing context on where each task is executed.
 - **Task to Volunteer:** Connects tasks to volunteers, enabling tracking of which volunteer is responsible for each task.
 - **Drop-Off Point to Venue:** Links drop-off points to venues, facilitating a detailed understanding of where food is being dropped off.

Sharing Rules:

To ensure that records are shared appropriately based on distance criteria, the following sharing rules were set up:

• Rule 1:

• **Label:** Rule 1

• Criteria: Records where the distance is less than 15 km

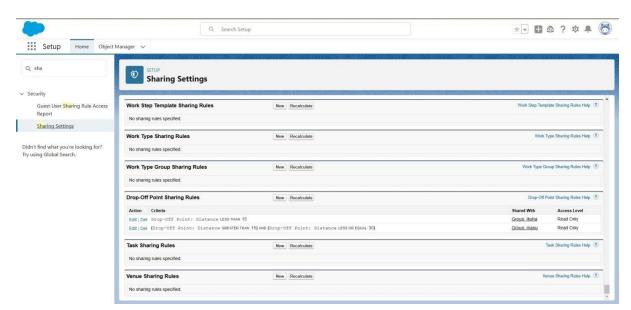

• Access: Shared with Public Group – Iksha

• Rule 2:

• Label: Rule 2

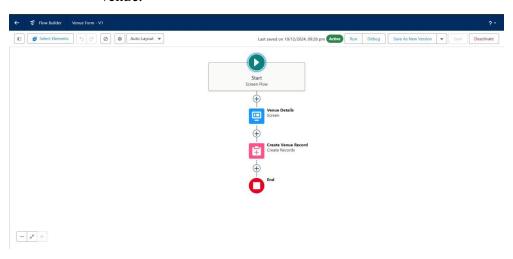

• Criteria: Records where the distance is between 15 km and 30 km

• Access: Shared with Public Group – NSS.

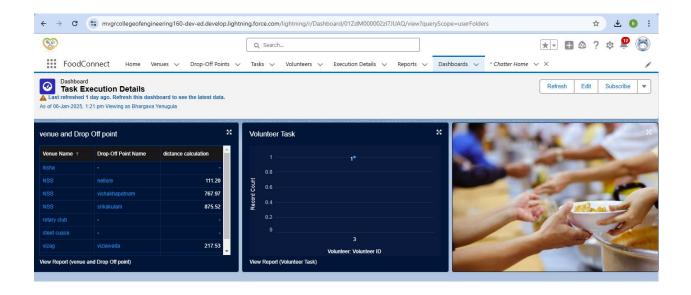

Flow and Dashboard:

- Flow: Venue Flow
 - **Purpose:** To manage and capture detailed information related to food drop-off points.
 - Components:
 - **Text Component:** For entering the venue name.
 - **Email Component:** For entering the contact email of the venue.
 - **Phone Component:** For entering the contact phone number of the venue.
 - **Text Component:** For entering the venue location.
 - **Number Components:** For entering latitude and longitude values of the venue.

Dashboard:

- Name: Organization Details
- Components:
 - **Lightning Table:** Displays detailed information about venues and dropoff points, facilitating a comprehensive view of the data.

3. Configuration and Setup

Instructions

Creating Custom Objects:

• 1. Drop-Off Point:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Drop-Off Point.

• 2. Task:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Task.

• 3. Volunteer:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Volunteer.

• 4. Execution Detail:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Execution Detail.

• Sharing Rules Setup:

- Go to Sharing Settings.
- Define new sharing rules for Drop-Off Point based on distance criteria, ensuring appropriate access for different public groups.

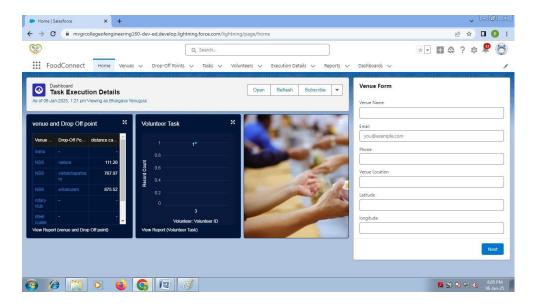

• Lightning App Builder:

• 1. Create Home Page:

- Go to Lightning App Builder > New.
- Select Home Page and name it "HOME Page."
- Add Flow and Dashboard components to the page.

• 2. Save and Activate:

- Click on Save and Activation.
- Set the page as the default for the FoodConnect app.

Report Types and

Dashboards:

• 1. Custom Report Types:

• Create report types for Venue with Drop-Off, with Volunteer and Volunteers with Execution Details and Tasks.

• 2. Reports:

• Generate and configure reports using the custom report types to track and analyze relevant data.

• 3. Dashboards:

• Configure dashboards to visualize data from reports and other components, providing insights into the overall distribution process.

4. Deliverables

- Code Files: Include Apex triggers and any other code implemented.
- Output Screenshots: Provide screenshots of custom objects, flows, dashboards, and reports to illustrate the setup.
- **Project Documentation:** Detailed descriptions of implemented features, configurations, and setup instructions.
- **Project Demonstration Video:** A video showcasing the functionality of the application, including key features and processes.
